Qufaro Cyber Security Foundation Course

The Qufaro Cyber Security Foundation course helps students gain the required knowledge to be fully prepared to study for a degree in Cyber or Computing. The course has been developed by a consortium of education and cyber security partners to provide a foundational base for those planning to go to University. The course is delivered using online distance learning tools and is closely linked with the accredited Level 3 CyberEPQ.

The course can be studied independently. It is guided by the National Occupational Standards in Information Security and aligned with the Chartered Institute of Information Security (CIISec) Skills and Knowledge Frameworks.

Qufaro Cyber Security Foundation Benefits

- Gain NOS & CIISec skills and knowledge

- **Achieve Foundation level knowledge in broad range of cyber security topics ready for University degree study in Cyber; Computing and/or IT**

- Access to Immersive Labs for real-time, gamified learning system for security skills

- **Achieve the Qufaro Certificate of Completion**

- Demonstrates strong commitment to cyber through independent study

- **Strengthens CV's and Personal Statement**

- Flexible study to fit in with own commitments

Inspire, challenge and stand out from your peers.
